

Dear colleagues, ladies and gentleman,

It is my great pleasure to invite you to the 9th international conference Hydrogen Days 2018 on hydrogen technologies and their applications. It intends to continue the tradition of establishing a meeting point in Prague, which builds a bridge between specialists in hydrogen technologies from different regions of Europe and beyond. This we express with the main motto of the conference:

“HYDROGEN – BRIDGING EUROPE AND THE WORLD”.

Many of you are approached with this invitation after one-year break. Maybe you have not found information on the Hydrogen Days 2017, 8th event in the series. The reason for the break was not our resigning on the continuous endeavour to promote hydrogen technologies also in the new European Countries. On the contrary, the latest edition of the conference, Czech Hydrogen Days 2017, took place as part of the big event World Hydrogen Technology Convention in July 2017. Thanks to engaged speakers and an audience great in number as well as in mutual interest, an atmosphere was created that brought Europe and the World closer together, at least in the field of hydrogen technologies. Let's come together again and continue our discussions. Let's discover further points of shared concerns and areas for collaboration. Let's come together and promote further development and mainly the implementation of hydrogen technologies in our daily lives.

Join us on June 13th - 15th once again at the National Technical Library in Prague.

Karel Bouzek
Chairman of the Scientific Committee

TOPICS

Stationary systems and applications
Transportation and mobile applications
Cross-cutting issues

IMPORTANT DATES AND DEADLINES

Deadline for paper submission	February 28, 2018
Confirmation of Acceptance	March 30, 2018
Authors' registration/ early bird registration	April 30, 2018
Registration cancellation deadline	May 31, 2018
Final Programme	April 30, 2018
Conference	June 13 - 15, 2018
