

**Dear member of the FCH States Representatives Group,**

Please find attached information concerning a **Global School Student Competition on "*Fuel Cell and Hydrogen Technology*"** launched by the German government and supported by the International Partnership of the Hydrogen Economy (IPHE). I would like to kindly ask you to disseminate this material among those organisation(s) in your country (perhaps through the Ministry of Science and Education?), which might be interested to participate in this important competition.

Please note that the competition is open to school teams of 2 to 3 students (aged between 14 and 18) and that the best national team will take part in an International Student Session during the 18th World Hydrogen Energy Conference in Essen, Germany, 2010. The main aims are to stimulate young people's enthusiasm for these technologies and to attract the next generation of experts.

If you need additional information please don't hesitate to contact me.

Thanks in advance and best regards,

Joaquin MARTIN BERMEJO
